3.	The tunnel canal was opened on 4 January of operation of the power plant was celes. The turbinehouse, an underground install with two turbines of American manufacture a capacity of 17,500 Kw. The transformer station was equipped with Six of these tranformers we seventh being held as a reserve.	te Engineer Brever. 1948. The starting brated on 25 July 1949. ation, was equipped e. Each turbine has h seven transformers, re in operation, the 50X1-HUM apacity 116,000 volts, r power transmission t was not in operation. ed for the supply under construction
3.	The tunnel canal was opened on 4 January of operation of the power plant was celes. The turbinehouse, an underground install with two turbines of American manufacture a capacity of 17,500 kw. The transformer station was equipped with Six of these transformers we seventh being held as a reserve. A high tension power transmission line caleadsfrom the plant to Yerevan. A similar line leadsfrom the plant to Kirovakan but A third power line, 35,000 volts, intend of power for the immediate vicinity, was but not completed at the time of observa	te Engineer Brever. 1948. The starting brated on 25 July 1949. ation, was equipped e. Each turbine has h seven transformers, re in operation, the 50X1-HUM apacity 116,000 volts, r power transmission t was not in operation. ed for the supply under construction tion. es, was at the end of 50X1-HUM plants under
3. 4.	The tunnel canal was opened on 4 January of operation of the power plant was celed. The turbinehouse, an underground install with two turbines of American manufacture a capacity of 17,500 kw. The transformer station was equipped with Six of these transformers we seventh being held as a reserve. A high tension power transmission line caleadsfrom the plant to Yerevan. A similar line leadsfrom the plant to Kirovakan but A third power line, 35,000 volts, intend of power for the immediate vicinity, was but not completed at the time of observational leading to the lange river.	te Engineer Brever. 1948. The starting brated on 25 July 1949. ation, was equipped e. Each turbine has h seven transformers, re in operation, the 50X1-HUM apacity 116,000 volts, r power transmission t was not in operation. ed for the supply under construction tion. es, was at the end of 50X1-HUM plants under
3. 4.	The tunnel canal was opened on 4 January of operation of the power plant was celes. The turbinehouse, an underground install with two turbines of American manufacture a capacity of 17,500 kw. The transformer station was equipped with seventh being held as a reserve. A high tension power transmission line cleads from the plant to Yerevan. A similar line leads from the plant to Kirovakan but A third power line, 35,000 volts, intend of power for the immediate vicinity, was but not completed at the time of observa A small power plant, having three turbin the canal leading to the Hange river. Comment: Comment:	te Engineer Brever. 1948. The starting brated on 25 July 1949. ation, was equipped e. Each turbine has h seven transformers, re in operation, the 50X1-HUM apacity 116,000 volts, r power transmission t was not in operation. ed for the supply under construction tion. es, was at the end of plants under in 50X1-HUM 50X1-HUM 50X1-HUM 50X1-HUM 50X1-HUM 50X1-HUM
3. 4.	The tunnel canal was opened on 4 January of operation of the power plant was celed. The turbinehouse, an underground install with two turbines of American manufacture a capacity of 17,500 kw. The transformer station was equipped with Six of these transformers we seventh being held as a reserve. A high tension power transmission line calcadsfrom the plant to Yerevan. A similar line leadsfrom the plant to Kirovakan but A third power line, 35,000 volts, intend of power for the immediate vicinity, was but not completed at the time of observath A small power plant, having three turbing the canal leading to the Mange river. There were seven other power construction along the Mange river up to	te Engineer Brever. 1948. The starting brated on 25 July 1949. ation, was equipped e. Each turbine has h seven transformers, re in operation, the 50X1-HUM apacity 110,000 volts; r power transmission t was not in operation. ed for the supply under construction tion. es, was at the end of 50X1-HUM 50X1-HUM 50X1-HUM 50X1-HUM
